Motor Driving School Management System

Motor driving school system is developed with Asp.net (C#) and for database we have used SQL server. It provides great security and good data retrieval speed for smooth data processing application. All students are divided into batches. These batches run on different times of the day. Student are allotted batch according to their suitable timings. Every batch has a trainer. He trains students for driving. He also keeps track of student's daily attendance. Other work can be handled by this application are employee record, salary and attendance of employee. Every registered student has a unique user id and password. Student can login with this id and password. Admin add basic tutorial of driving. These videos can be seen by the students after they log into the system.

Modules:

1. Login
2. Edit profile
3. Video tutorial
4. Vehicle master
5. Batch master
6. Department master
7. Student master
8. Student attendance
9. Attendance report
10. Student renewal
11. Employee master
12. Employee salary
13. Employee attendance
14. Employee attendance report
15. Tutorial master
16. User report
17. View inquiry

Minimum Software Requirements:

- Windows 7
- Sql 2008
- Visual studio 2010

Minimum Hardware Components:

- Processor – Dual Core
- Hard Disk – 50 GB
- Memory – 1GB RAM

Advantages:

- This is a web based application. Data is stored in a centralized database.
- Vehicle, batch, department and batch record can be handled by this application. For maintaining every type of the above work there is a separate module in the application.
- Student and their batch details also managed by this application.

Application:

Motor driving school is an application for managing motor training Institute management system. This application automates manual tasks of managing all records of Student admission, Attendance, vehicles and trainers. This system has a main user called Admin. This admin has full control over all the modules of Motor driving school system project. This system also has a feature of Digital learning system. Admin can post video tutorials to learn the basics of driving for beginners.
